

GIA HUY TRAN

WEB DEVELOPER

Currently a third-year Computer Science student from Can Tho University. I consider myself a sociable and enthusiastic person, but when it comes to work, I'm quite a persistent and responsible worker. I'm looking forward for a chance at an internship as a web developer. Technologies i'm most familiar with are NodeJS and ReactJS as well as SQL and MongoDB.

EDUCATION

2020-Current Computer Science - CanTho University

I'm currently still studying Computer Science at CTU and looking forward for an internship.

FEATURED PROJECTS

Pathfinding algorithms Visualisation

A python application to visualize a few graph algorithms including A*, Dijkstra, BFS and DFS

A Todo-app

A todo-app with many features such as filtering, searching , sorting. Created with ReactJS and Redux, Redux thunk

Personal Portfolio Website

A project to showcase my details, career and projects. Made with ReactJS, Bootstrap, this project specialize on the frontend part.

CanTho University Timetable

Another project i made with ReactJS. The web-app help students in my university arrange their own school schedule by selecting courses from the school's management system

Library Mangement System

A system to manage book data and orders for a small library. From this project, i learned a lot about designing database, user authentication with JWT and redux thunk middleware
