

GIA HUY TRAN

WEB DEVELOPER

Currently a third-year Computer Science student from Can Tho University. I consider myself a sociable and enthusiastic person, but when it comes to work, I'm quite a persistent and responsible worker. I'm looking forward for a chance at an internship as a web developer. Technologies i'm most familiar with are SpringBoot and ReactJS/Angular as well as SQL and MongoDB.

EXPERIENCES

6/2/2023 - 7/5/2023 Intern at TMA Solutions

At TMA Solutions, i were mainly trained with Spring Boot and Angular. In here, i learned about advanced database technique, mircroservice, rabbitMQ. Then finally, i'm asked to build a Coffee Management project with everything that i had learned.

FEATURED PROJECTS

Personal Portfolio Website

A project to showcase my details, career and projects. Specialize in front-end with React

Library Mangement System

A system to manage book data and orders for a small library. From this project, i learned a lot about designing database, user authentication with JWT and redux thunk middleware

Milk Storage Management

A real project to help mange a storage especially the product's expriation date. Using React/Node/MongoDB. Using a noSQL database, i have learned alot more of their pros and cón.

The Coffee House Management

A project i built since internship at TMA. Made with SpringBoot/Angular/MySQL. Apply database technique like transaction, indexing, caching with Redis, auditing, using microservice with RabbitMQ, apply testing for backend service.
